Bengaluru, India | [bindujayachandranarjun@gmail.com](mailto:bindujayachandranarjun@gmail.com)

[linkedin.com/in/arjun-bindu-jayachandran](https://linkedin.com/in/arjun-bindu-jayachandran) | [github.com/Arjun-B-J](https://github.com/Arjun-B-J) | Portfolio: [arjun-b-j.github.io](https://arjun-b-j.github.io)

Senior Software Engineer specializing in Applied AI, Generative AI, Machine Learning, and Java backend systems for Fixed Income and real-time Profit and Loss (P&L) workflows. Top Achievers Award recipient at Wells Fargo (top 1% of employees firm-wide) for ML, GenAI, and P&L platform delivery on the fixed-income trading desk.

## EXPERIENCE

**Wells Fargo** | Bengaluru, India

### Senior Software Engineer

Jan 2026 - Present

- Built a bond recommendation engine from the ground up in Python, scoring about **4 million client-offering pairs daily** with XGBoost learning-to-rank. Piloting with the desk, projected to save millions in sales commissions.
- Engineered the engine's feature pipeline and in-house MLOps stack, matching a **3.7M-row** external holdings dataset to internal counterparty IDs so the model learns what each client already owns.
- Automated Java and Spring Boot integration test authoring across **80+ microservices** with a multi-agent AI framework on GitHub Copilot, so engineers stopped hand-writing tests and defects surfaced before release.
- Cut end-to-end **p95 latency 66%** on slow P&L calculations by benchmarking each Java service route to isolate the bottleneck, then reworking throttling and load distribution so traders saw positions refresh sooner.
- Shipped a historical rerun REST API for the P&L services on async Camel routes, so corrected past positions persist to MongoDB without republishing into the live Kafka stream.

### Software Engineer

Sep 2023 - Dec 2025

- Built LLM agents in Python on LangGraph and MCP that let staff query MongoDB by typing plain-English questions, running hybrid BM25-plus-vector RAG over schema stores behind injection guards, PII masking, and audit logging.
- Cut p95 read latency from around **710ms to 230ms** by rebuilding the Spring Boot P&L services' real-time read path on MongoDB with aggregation pipelines, so risk screens kept pace with the market.
- Cut multi-million-dollar reporting-penalty exposure with a clean P&L activity-tracking layer, working cross-functionally in agile Scrum sprints with 2 trading-desk teams to roll out correlation-ID audit tracking across 8 repositories.
- Led the end-to-end migration of 10+ Java services to Red Hat OpenShift, developing Helm charts and GitHub Actions CI/CD workflows to automate Kubernetes deployments, cutting each release from 4-5 engineer-hours to about 2.
- Championed AI-assisted development, presenting agentic workflows to **200+ engineers**, authoring P&L architecture documentation, running knowledge-transfer sessions, and mentoring peers on workflows they use daily.

### Program Associate

Jul 2022 - Aug 2023

- Saved **2-3 person-hours daily** by owning an asset-backed-finance reporting workflow end to end with traders, building an Excel ingestion engine with schema migrations and reference-data reconciliation.

## SKILLS

**Languages:** Python, Java, C++, C

**AI/ML:** LLMs, AI agents, Agentic RAG, LangGraph, MCP, Claude Code, Vector databases, MLOps, LLM evals, XGBoost, Recommender systems, AI guardrails

**Backend:** Distributed systems, Event-driven microservices, Apache Kafka, Spring Boot, MongoDB, SQL, Redis, Concurrency and multithreading, Performance engineering, Data engineering

**Cloud and CI/CD:** OpenShift, Kubernetes, Docker, Helm, GitHub Actions, Gradle, Maven, Azure

## EDUCATION

**National Institute of Technology, Calicut (NIT Calicut)**

Kozhikode, India

B.Tech in Computer Science and Engineering, CGPA 8.55/10

2018 - 2022

## PUBLICATIONS & AWARDS

**Publication:** SaBMOGWOW-S, a feature-selection algorithm. *The Journal of Supercomputing* (Springer), 2023 (co-author).

DOI: [10.1007/s11227-023-05145-y](https://doi.org/10.1007/s11227-023-05145-y).

- Top Achievers Award, 2025:** Wells Fargo's highest individual recognition, for high-impact P&L and GenAI delivery.
- Top Innovator, Innovation Pitch Day 2024:** top 4 of 600+ firm-wide entries, for a natural-language database assistant.
- Manager Spotlight Awards (x2):** awarded for consistent ownership and delivery.
